Treated articles: allowed active substances

Prepared as of 13 November 2017

EXPLANATORY NOTE

The following table lists the substance/product-type combinations submitted by 1 September 2016.

Part I contains substance/product-type combinations which are under examination or have been approved (i. e. they were included on Union list or Annex I list). Articles treated with a biocidal product (or intentionally incorporating a biocidal product) containing an active substance which is listed in Part I are legally on the EU market.

Part II contains substance/product-type combinations for which a submission was made by 1 September 2016 but the submission was rejected or a non-approval decision was adopted. Articles which were treated or incorporated a biocidal product containing that active substance should no longer be placed on the market as from 180 days from that rejection or non-approval decision. The actual phase-out dates for such treated articles are provided. Also substance/product-type combinations are indicated where such a non-approval decision is pending.

The list in Part II contains also substance/product-type combinations which are in the Review Programme but the participant(s) withdrew and the call to take over the role of participant is ongoing. Companies are encouraged to submit a notification to ECHA for taking over the role of the participant for that substance/product-type combination. See https://www.echa.europa.eu/regulations/biocidal-products-regulation/approval-of-active-substances/existing-active-substance/successful-declarations-of-interest.

Part III contains substance/product-type combinations notified for inclusion in the review programme for which ECHA has issued a declaration of compliance in accordance with Article 17(5) of the Review Programme Regulation (EU) No 1062/2014) or where such a notification is being processed. The list includes notifications made for redefined active substances, substance/ product-type combinations in part 2 of Annex II to the Review Programme Regulation substances that previously benefitted from the food & feed derogation, substances where the product-type was modified under the BPR compared to the BPD. The active substance approval application is expected to be submitted by the participants within 2 years of the relevant notification compliance decision. Articles treated with a biocidal product (or intentionally incorporating a biocidal product) containing an active substance which is listed in Part III are legally on the EU market.

Part I: Substance/product-type combinations under examination or approved
